

Coin Technology Menu

Electrolux is a world-wide leader in developing long-lasting energy and water efficient products. It's a company you can rely on for the very best profit generating equipment. With more than 100 years of experience behind every machine, Electrolux understands your business and is dedicated to providing you with the most advanced solutions.

Automatic Water Savings

Save a fortune on water—as much as 30% on small wash loads. AWS automatically calculates the actual weight of the load—then adds precisely the right amount of water for best results. It significantly reduces water consumption and energy costs. AWS is only available from Electrolux, the technology leader.

Compass Pro

Revolutionary microprocessor features a large display and a robust knob for easy program selection. Offers 20+ languages, easy access to USB, and superior wash performance. Easily adjust parameters such as water levels, temperatures, and drum action to lower costs and meet customer demand. Real time clock for time of day pricing. Unique Voice Guidance and Text Messaging systems available.

EcoPower

Save up to 15% in gas. This unique technology determines when garments are dry and then automatically lowers the dryer temperature. Your customers are satisfied because the dryer keeps turning, resulting in less wrinkling and wear on garments. With reversing dryer cylinders (standard) your efficiency and savings are even greater

High Spin 450G

Faster drying time and lower gas consumption with Electrolux High Spin washers—now at 450 G-force extraction. Soft-mount technology for easy installation on wood floors, upper floors, and over basements. Laundries benefit from faster throughput which translates to greater customer turns and profits. You'll create customers for life with short laundering times and outstanding wash results.

Pronto Combo Washer/Dryer

Wash and dry in one machine. Your customers will enjoy their laundry experience like never before! You'll distinguish your laundry and create life-long customers. Uses less than half the space of a separate washer and dryer. Pronto can be installed on wood floors, upper floors, and over basements. This unique 350 G-force soft-mount combo washer-dryer does not require a concrete foundation or steel base.

Reversing Dryer Cylinders

With standard Electrolux reversing cylinder technology, garments don't tangle so they dry more quickly using less energy. Dry more uniformly for superior results without "wet spots." Electrolux dryers are precision-engineered for efficiency, ease of use, and superior drying results.

Super Balance / Power Balance

Electrolux Super Balance and Power Balance extend the lifetime of your machine. These unique features precisely and automatically calculate the amount of unbalanced load in the washer drum, then adjusts distribution and extraction speeds to maximize water extraction. Lower maintenance costs, less vibration, maximum water extraction, and lower energy costs.

Text Messaging

This feature generates customer loyalty and is a valuable marketing tool. Customers receive a text from the washer telling them when washers are available, when their laundry will soon be done, and more. Owners can have washers send text messages for service, access price programming menu, check coin count in money boxes, and more.

Sanitizing Rinse

Another unique Electrolux feature. Customers appreciate having the choice of sanitizing the drum prior to washing their personal laundry. You have the ability to charge for the rinse, generating additional income.
