SUSTAINABILITY

Environmental responsibility and superior performance

The Electrolux approach to sustainability is geared at developing smarter, more accessible, resource-efficient solutions that meet people's needs and improve their lives.

Dow Jones Sustainability World Index includes the 10% best-in-class economic, environmental and social performers among the world's 2,500 largest companies. has been included every year since the index was launched in 1999.

Electrolux has been recognized by CDP for taking actions to reduce carbon emissions and mitigate the risks of climate change.

Electrolux was selected for the GC 100, a new global stock index combining stated commitment to the UNGC ten principles, corporate sustainability as well as baseline financial performance.

**Global Compact
100**

Electrolux is listed among the 100 most reputable companies in 2013 according to the Forbes ranking, compiled together with the Reputation Institute.

**Forbes: The World's
Most Reputable
Companies, 2013**

Electrolux has a long-term commitment to help improve management of limited water resources. Two years ahead of schedule, the Group achieved its 2014 goal of a 20 percent reduction in water consumption in operations. During 2013 and together with WWF, Electrolux mapped water-related risks associated with Group factories. As a result, new and more stringent targets have been set for factories in water-stressed areas.

Sustainability is a core element of Electrolux Group's strategy. Focus is on resource-efficient products, engaging employees in sustainability objectives and increasing awareness of the positive and negative impacts across the value chain.

Its criteria for products include low electricity, water, and gas consumption – without compromising functionality and performance. With new programming mechanisms, exclusive Electrolux systems, innovative designs and adaptations for 98% recycling, its “green” range of products are the ideal response to the requirements of sustainable development.

Electrolux Professional soft-mount washers up to 45 lb. capacity are Energy Star rated. They meet strict energy efficiency guidelines set by the EPA & US Department of Energy. Electrolux Professional's larger machines are designed to save water and energy as well and achieve impressive Modified Energy Factor (MEF) results. Electrolux maintains high environmental and ethical standards in its facilities; manufacturing plants and products are certified in accordance with the ISO 9001 (quality) and ISO 14001 (Environmental Management) standards.

Product features such as Automatic Water Savings (AWS), Smart Dosing, Compass Pro controller, AutoStop, PowerBalance, standard Reversing, and Residual Moisture Control are just a few of the innovations designed to increase your productivity while reducing energy and water consumption. Electrolux is recognized as being on the cutting-edge of developing energy and water efficient products and the Company has a long and outstanding reputation in environmental and corporate responsibility.
