

Coin Technology Menu

Electrolux is a global leader in developing long-lasting energy and water efficient products. With more than 100 years of experience behind every machine, Electrolux understands your business and is dedicated to providing you with the most advanced solutions.

Auto Savings

Save a fortune on water — as much as 50% on small wash loads. AS automatically calculates the actual weight of the load — then adds precisely the right amount of water for best results. It significantly reduces water consumption and energy costs.

Compass Pro

Revolutionary microprocessor features a large display and a robust knob for easy program selection. Offers 20+ languages, and superior wash performance. Easily adjust parameters such as water levels, temperatures, and drum action to lower costs and meet customer demand. Real time clock for time of day pricing. Unique Voice Guidance and Text Messaging systems available.

LaundryPulse

With LaundryPulse, you can analyze machine utilization, view revenue reports, manage and set pricing, and more. It gives you up-to-the-minute data from anywhere at anytime so you can make informed and timely business decisions. Add the LaundryPay App and your customers can use their cell phone to pay for their wash.

High Spin 450G

Faster drying time and lower gas consumption with 450 G-force extraction. Soft-mount technology for easy installation on wood floors, upper floors, and over basements. Laundries benefit from faster throughput which translates to greater customer turns and profits. You'll create customers for life with short laundering times and outstanding wash results.

Electrolux

Super Balance / Power Balance

Electrolux Super Balance and Power Balance extend the lifetime of your machine. These unique features precisely and automatically calculate the amount of unbalanced load in the washer drum, then adjust distribution and extraction speeds to maximize water extraction. Lower maintenance costs, less vibration, maximum water extraction, and lower energy costs.

Text Messaging

This feature generates customer loyalty and is a valuable marketing tool. Customers receive a text from the washer telling them when washers are available, when their laundry will soon be done, and more. Owners can have washers send text messages for service, access price programming menu, check money boxes, and more.

Voice Guidance

Assist visually impaired customers by providing instructions verbally on how to use the machine. This added feature is a great way to provide service to your community.

Sanitizing Rinse

Another unique Electrolux feature. Customers appreciate having the choice of sanitizing the drum prior to washing their personal laundry. You have the ability to charge for the rinse, generating additional income.

EcoPower

Save up to 15% in gas. This unique technology determines when garments are dry and then automatically lowers the dryer temperature. Dryer keeps turning, resulting in less wrinkling and wear on garments. With reversing dryer cylinders (standard) your efficiency and savings are even greater.

Reversing Dryer Cylinders

With Electrolux reversing cylinder technology, garments don't tangle so they dry faster using less energy. They also dry more uniformly for superior results without "wet spots".
